option (2-9 Players depending on how many attempts you want on each screen). In response to 'How many games will you try?', type a non-integer number eg. 2.5 . After each game the program will check that the required number of games have been played, but as you will never have played 2.5

games you can go to the end of the Pathways. Unfortunately 'The Beacons' do not appear, so cannot be mapped and the program crashes at the end. For lots of Q-Jumpers, first select a two player game. Then for player ones name enter '1978 WAS FUN'. The screen will now turn black. Type INK 7 and press RETURN. Then EDIT 1009 and press CTRL-D, change the final POKE to POKE 638F,255. RUN and you'll start the game with 255 Q-jumpers allowing you to reach the 30th beacon and finish the game. [voir aussi le Ceo-Mag n°225 pages 18-20]
